

# **RESONANCE**

A PROJECT BY  
PHILIPPE BAUDELOCQUE

—

## THE PROJECT

The **RESONANCE** project is a happening in the city with a wall drawing in a street which name refers to an animal.

The subject of the drawing is this animal.

Two choices are possible :

### . EPHEMERAL

The drawing is done with chalk so its duration depends on human behaviour and weather.

### . PERMANENT

The drawing is done with fixed soft pastel or with oil pastel.

—

## NATURE

The drawings are composed of cells.

To each cells there is an attached dimension.

To each dimension there is an attached pattern.

One of the possible etymology of the word "pattern" is :  
to put the Plan in movement.

The artist appropriates entirely this meaning and makes with his drawings some constelations through an animal's shape.

This way, the organic meets the cosmic.

More than just animals they are symbols and representant of Mother nature.
